

Types of CSS

Let us know how many types of CSS are there.

Inline Style Sheet

Embedded or Internal style sheet

External Style Sheet

What is the full form of CSS?

Today there are many students who do not know the full form of CSS, so I would like to tell them clearly that the full form of CSS is – Cascading Style Sheet

What are the benefits of using CSS? go in hindi

1:- If you use CSS to design your web page and once you have written the CSS code, then you can use the same CSS code again in your web page, just on behalf of your requirement. Colors etc have to be changed. This saves your time and gets the job done easily.

2:- You can reduce the load time of any page with the help of CSS and provide fast loading speed to the web page.

3:- Through CSS, you can easily maintain any of your documents.

4: - By using CSS in web pages, the design is not only beautiful, as well as you can easily get your page ranked in the ranking of the search engine.
